

TIFFIN MATS

Quality Mats for Athletes Worldwide

Who we are

Tiffin Mats, Inc. has over 35 years of experience in manufacturing athletic mats and athletic equipment.

A family run business, we have quickly grown to be one of the leaders of the athletic equipment industry, providing the highest quality equipment to gyms, schools and other athletic organizations.

Our customer service is unmatched, we will work with you to ensure that not only you get the products that you need but that they arrive on time and you are satisfied with them.

United States

What makes us different

- Tiffin Mats cares about the environment and conserving resources for future generations to come.
- Not only do we offer a recyclable product but we also take the time to recycle any waste we might have in our factory. We recycle all our office paper and soda machine bottles, we send our left over polyurethane foam to the company Leggett & Platt that turn it into bedding or home furniture components, and we send our cross-linked polyethylene foam to Poly-Green Foam who recycle post industrial foam into usable cost effective products such as playground surfacing and drainage systems.

Eco Sport Mat

- Tiffin mats is the only leading manufacturer of **ecoFiber** standard & flexible carpet bonded foam.
- Our fiber is made from 100% post- consumer recycled plastic bottles which means it was a product that has completed its life cycle as a consumer item.
- By using 100% post- consumer recycled bottles we are helping lower harmful air emissions and save millions of barrels of oil from being used.
- Our carpet foam saves 43,000 plastic bottles from filling our landfills everyday.
- The **ecoFiber** is flame-laminated directly to the foam with no latex backing.

Plastic PET containers are picked up at community recycling centers, then sorted by tupe and color.

They are stripped of their labels and capes, washed and crushed then chopped into flake.

The flake is melted and extruded to creae fiber. The fiber is crimped, cut, drawn and stretched into desired length for strength then baled.

The baled fiber can be processed into fabric for a variety of textile product end uses.

ecoFiber

-from bottles to fabric

Tiffin Gymnastics

Our competition landing Mats meet the specifications of USAG, FIG, NCAA and the National High School Federation for gymnastics and competitions.

Competition Landing Mat
Training Mat
Throw Mat
Sting Mat
